Suthida Sunthonrak (สุธิดา สุนทรักษ์)

Network & Cloud Infrastructure Engineer | SPU ICT Student

Email: suthida.sunthonrak@spumail.net | Tel: 08x-xxx-xxxx | Bangkok, Thailand | GitHub: github.com/suthida-net | LinkedIn: linkedin.com/in/suthida-sunthonrak

PROFESSIONAL SUMMARY

Passionate ICT undergraduate with hands-on expertise in Enterprise Network Architectures, Routing & Switching (OSPF, BGP, VLANs), pfSense Firewall security, Proxmox VE virtualization, and NetDevOps automation using Python and Ansible. Experienced in designing, configuring, and troubleshooting complex topologies in GNS3, EVE-NG, and live homelab environments. Actively seeking an Internship / Junior Network Engineer role.

TECHNICAL SKILLS

Enterprise Networking:	OSPF, BGP, EIGRP, STP, RSTP, 802.1Q VLANs, Inter-VLAN Routing, EtherChannel, HSRP/VRRP, NAT, ACLs
Simulation & Virtualization:	Cisco Packet Tracer, GNS3, EVE-NG, Proxmox VE, VMware ESXi, Docker
Network Security:	pfSense Firewall, FortiGate, WireGuard VPN, IPsec Site-to-Site, Snort IDS/IPS, Network Hardening
NetDevOps & Automation:	Python (Netmiko, Paramiko, Scrapli), Ansible Playbooks, RESTCONF, NETCONF, Git, Bash
Monitoring & Analysis:	Zabbix, Grafana, Wireshark (Deep Packet Inspection), SNMPv2/v3, Syslog Server

FEATURED HANDS-ON LABS & PROJECTS

Enterprise Multi-Site WAN & Dual-ISP BGP Topology | EVE-NG, Cisco IOS-XE

- Designed enterprise topology connecting Headquarter and 2 Branch offices across dual ISP connections with eBGP peering.
- Implemented internal OSPF routing, BGP route manipulation (AS-path prepending, Local Preference), and HSRP for default gateway redundancy.
- Configured Site-to-Site IPsec VPN failover tunnel ensuring 99.9% uptime during primary WAN link outage.

Automated Network Configuration & Drift Detection | Python, Ansible, Git

- Developed Ansible playbooks to provision VLANs, NTP, Syslog, and ACLs across 40+ simulated Cisco switch nodes in minutes.
- Created Python script using Netmiko to pull running-configs daily, compare against baseline in Git repository, and alert on unauthorized changes.

High-Availability Proxmox Homelab with pfSense & WireGuard | Proxmox VE, pfSense, Linux

- Deployed virtualized pfSense router on Proxmox VE with segmented VLANs: Management (VLAN 10), Servers (VLAN 20), and Secure IoT (VLAN 30).
- Configured WireGuard VPN server for secure remote access with split-tunneling and firewall rules restricting access to internal subnets.
- Set up Zabbix agent monitoring CPU, RAM, and bandwidth thresholds with instant Telegram notifications.

EDUCATION

Bachelor of Science in Information and Communication Technology (ICT)

Sripatum University (SPU), Bangkok, Thailand | Expected Graduation: 2026

- Relevant Coursework: Data Communications & Networks, Enterprise Network Design, Network Security, Cloud Computing, Scripting for Network Engineers.

CERTIFICATIONS & ACADEMIC CREDENTIALS

- Cisco Networking Academy: Enterprise Networking, Security, and Automation (ENSA) (2025)
- Cisco Networking Academy: Switching, Routing, and Wireless Essentials (SRWE) (2025)
- Cisco Certified Network Associate (CCNA 200-301) - In Progress / Exam Scheduled
- Fortinet Network Security Expert (FCF - Fortinet Certified Fundamentals)
